## Go ahead. Ask Russ McKennan about “t” values.

Involved as we are with the thousands of day-to-day details which go into turning out reliable audience estimates, we sometimes tend to assume that everyone knows exactly what we know about all the ARB practices which help us produce good research . . . things like “t” value comparisons of research results, which are used to determine the statistical significance of the findings.

Even our research director can't tell you *everything* about statistics. But he does know his work . . . our work. And we certainly can tell you what you should know in order to use ARB research material to best advantage. That's our objective.

So don't hesitate to ask a question. If we can help provide a clearer understanding of *why* we do what we do, both of us will benefit. You'll be able to use an ARB audience report with more confidence. And, we'll have the pleasure of describing the meticulous care that goes into each one.

# Have you talked to a hillbilly lately?

We mean really talked to him?

Chances are he won't live up to your expectations.

No bib overalls . . . No high-top workshoes . . .

And the corn liquor jug? More probably Bonded . . . or a Dry Martini.

Take Homer here. Looks good, thinks straight . . . smart guy . . . good businessman . . .

Like lots of us hillbillies.

Maybe you should talk to a hillbilly . . . learn the facts he's turned up in a new study of this \$2½ BILLION DOLLAR MARKET he lives in.

It's covered in depth by WSAZ-TV.

**AFTER KNOCKING ON 935 DOORS.....**

**MR. MAGID FOUND OUT MILWAUKEEANS  
ARE CRAZY ABOUT US.**

For example, they think WTMJ-TV is the most professional, most modern, most mature television station in Milwaukee. They feel WTMJ-TV has the best, most complete news. And the most experienced, most professional news staff.

What about weathercasts? They like those on WTMJ-TV best. They like our weatherman most of all, too. Sports? The majority said WTMJ-TV has the top coverage. Best sports staff, too. And movies? There again Milwaukeeans prefer to watch ours.\*

What's all this mean to you? Simply this: Since WTMJ-TV is first choice with Milwaukeeans, shouldn't it be first choice with your Milwaukee television plans? Of course it should.

*\*From a study of attitudes and opinions, Frank N. Magid Associates.

## **NBC INTERNATIONAL: UNIQUE SERVICE IN A UNIQUE FIELD**

In the realm of world communications, television enjoys a privileged role. No other medium can unite peoples of different lands and backgrounds so quickly, intimately and effectively. And in the field of international television, you will find one organization whose resources and experience have placed it in a class by itself. ■ That organization is NBC International. In more than 80 regions—representing more than 300 stations over the globe—NBC International renders an unequalled service ranging from the construction of TV facilities to the distribution of TV programs. It is a service that not only

grows with the times, but anticipates them as well. Color TV, for example, is mushrooming in popularity throughout the world; and—because of its association with the National Broadcasting Company, pioneer in color TV—NBC International is uniquely prepared to satisfy this increasing demand for color. Uniqueness, in this instance, begins at home, where NBC is the Full Color Television Network. ■ In *all* instances, NBC International has brought a pioneering spirit to global communications—and has become, in consequence, the leading broadcaster in the international field.

# Armed Forces Television Stations

All stations are operated by the Military Departments under the jurisdiction of the Department of Defense. The Assistant Secretary of Defense (Manpower) provides policy guidance through his Directorate for Armed Forces Information & Education (AFIE), Washington, D.C. 20305. The Armed Forces Radio & Television Service (AFRTS) in Los Angeles under the jurisdiction of AFIE ships the bulk of the television programs to the stations. The U.S. commercial networks provide television programs to AFRTS. Those stations with asterisks (\*) are not a part of the AFRTS overseas operations.

for just a few of their reasons

**One of America's shrewdest economists was getting a little concerned about our**

Jack Benny, star of stage, screen, radio and TV, and bulwark of the American dollar.

**country's money problems. So he wrote this post card to the Secretary of Commerce.**

**This was the reply Mr. Benny got from the Secretary of Commerce.**

Dear Secretary Connor,  
I've been hearing so much about America's balance-of-payments deficit and our outflow of dollars that, naturally, I got concerned.  
First of all does "balance-of-payments deficit" mean we owe other countries money? If so, how did we ever get into a situation like that? And can't we just owe it to them? Everybody knows we're good for the money. So why should we have to pay it?  
Secondly, even if they ask for their money why do we have to give it to them in gold? Won't ordinary American dollars do?  
Last but not least, I was wondering if there was any reason for me, personally, to be concerned? Not that I have that much money. But over the years I've managed to hold onto a few dollars. Paper dollars, that is. Do you think they'll remain as good as gold?  
Sincerely,

*Jack Benny*

THE SECRETARY OF COMMERCE  
WASHINGTON 25, D.C.

Dear Mr. Benny:

We appreciate your interest in America's balance-of-payments deficit. It is a serious problem, but one we have every confidence of solving with the help of American businessmen and bankers and the understanding of the American people.

To answer your questions: "Balance-of-payments deficit" means more dollars are going out of this country than are coming in. We got into this situation by spending more abroad, over the short term, than we receive from abroad.

For example, American business is expanding overseas, using American dollars to build factories and office buildings for future economic growth. Our military bases abroad and our economic assistance to developing countries take dollars...much more than the dollars we get back, for instance, for the goods we export. As a result, our "outgo" is greater than our income. So, we have a balance-of-payments deficit.

When foreign countries ask to redeem their dollars in gold, we must give it to them because this country is pledged to exchange dollars for gold upon demand. The strength and stability of the dollar and to a great extent, the strength and stability of all the world's currency, depend on our fulfilling that pledge.

Finally, Mr. Benny, you certainly need not be concerned about your personal finances. The dollar is as good as gold. It is backed up by the world's most productive and efficient economy that gets more productive and more efficient every year. In addition, our government, businessmen, bankers, and military are all working together to solve the balance-of-payments problem. And it will be solved.

As President Lyndon Johnson has said, "Those who fear for the dollar are needlessly afraid. We will eliminate our international deficit. We will maintain the dollar at full value."

For the full story on our balance-of-payments situation and what we are doing about it, I am enclosing a booklet, "Keeping the American Dollar Strong." If any of your friends would like a free copy just ask them to write to: "Good as Gold," U.S. Department of Commerce, Washington, D.C. 20230. A postcard will do.

Sincerely,

*John T. Connor*

## To get a good job, get a good education

Jobs demand it. Employers insist on it. So you'd better plan on having what it *really* takes to get the kind of job you want.

Today, there's no fooling about schooling. You honestly need a good education to get a good job . . . a good *paying* job . . . a job with a good future.

So, if you're in school now . . . stay there! Learn all you can for as long as you can. If you're out of school, there are plenty of ways to get valuable training outside the classroom. For details, visit the Youth Counsellor at your State Employment Service. Get a good education . . . you can't get ahead without one.

**You need at least one, maybe two, possibly all three.**

**For master tape production:**

The Ampex VR-2000 Teleproduction Videotape\* Recorder. Now—for the first time—you get master tapes which can be duplicated to the fourth generation in black-and-white. Get superb, broadcast-quality multiple generation color copies, too. Now—for the first time—you get *total* teleproduction including unlimited editing capability with the exclusive Ampex Editec\* System.

**For economical studio tape**

**operations:** The Ampex VR-1100 Solid State Videotape Television Recorder. Here's the station workhorse—the most reliable recorder of its kind. No wonder it was specified for 60 installations in one 90-day period. Accessories are optional: add the Amtec\* Electronic Editor, Intersync\* and color capability extras when you need them. You don't pay for accessories you don't need.

**For reliable remote operations:**

The Ampex VR-650B Videotape Television Recorder. It's the world's first fully-transistorized portable—durable, trouble-free and lightweight for fixed or mobile use. And now it's available with the exclusive Ampex Electronic Editor. Get the full details. Write: Ampex Corporation, 401 Broadway, Redwood City, California

## Keep our leaders coming

We need college-educated leaders to make wise use of our resources, manpower and skills. They help develop jobs, opportunities, high living standards. But facilities and teachers take money. Give to the college of your choice.

## Keep our colleges going

## Help the colleges

College-educated leaders serve us all . . . make wise use of our resources, manpower and skills . . . create opportunity, jobs and high living standards. We need leaders—the colleges need funds to train them.

## Help yourself

# Allocations by States & Cities: VHF & UHF

Following table constitutes Part 73, Sec. 73.606 (b), amended, effective March 28, 1966 included in Fifth Report and Memorandum Opinion & Order, adopted Feb. 9, 1966. Asterisks (\*) indicate channels are reserved for non-commercial educational use. Plus (+) and minus (-) symbols after VHF channels designate offset carrier positions. Offset designators for UHF channels will be assigned by FCC at a later date.

## Assignments Affecting Borders

# Channel Allocations for Canada and Mexico

Allocations within 250 miles of Canadian and Mexican borders are as agreed upon by U.S. and respective countries through exchange of diplomatic notes. Though allocations beyond 250 miles of border do not require agreement between countries, Canada unofficially reports assignments beyond 250 miles; Mexico reports VHF within 250 miles, UHF within 200 miles.

Plus (+) and Minus (-) symbols designate offset carrier positions of channels

(L) indicates limited allocation under "Working Arrangement" of Canadian-U.S.A.

Television Agreement of 1952, announced March 29, 1961.

## what does it take to be first in CATV (and how do you stay there) ?

Jerrold's answer is: "Customer satisfaction!" Our systems satisfy the CATV owner/operator because they're engineered for subscriber satisfaction. When you buy Jerrold, you get . . .

**Reputation**—15 years and 1,700 systems after we equipped the first commercially successful CATV system, more CATV operators depend upon Jerrold for subscriber satisfaction than upon any other single source. *Jerrold is Number One* in the CATV industry.

**Know-how**—Jerrold has consistently maintained the industry's largest

staff of development engineers. A staff which has provided such "firsts" as the Channel Commander which made 12-Channel systems a

reality. A staff which is justifiably proud of its latest "first": Starline—the new standard for solid-state CATV distribution system quality and performance.

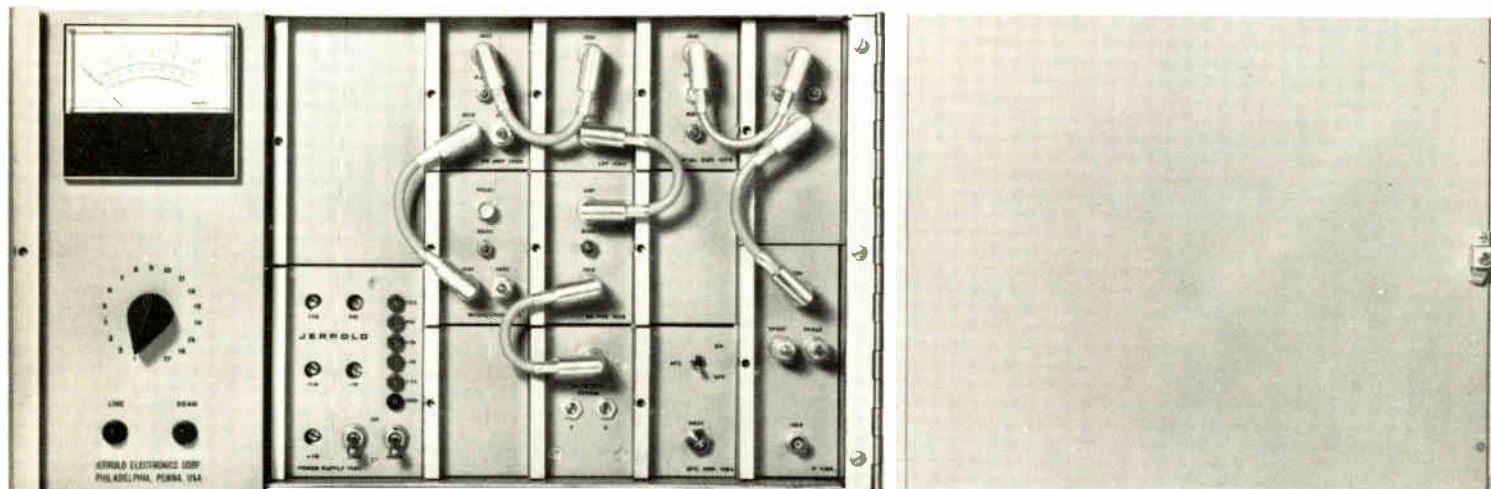

**Services**—Jerrold has built more systems on a "turnkey" basis than any other manufacturer/contractor in CATV. Our nationwide organization can help you in any and every stage of providing a profitable CATV system—from marketing and engineering-surveys, through system engineering and construction, to turning over to you a complete, operating system.

Whatever your CATV requirement—consult Jerrold first. Call 215-226-3456 or write: CATV Systems Division, **JERROLD ELECTRONICS CORPORATION**, 15th and Lehigh Ave., Philadelphia, Pa. 19132

# the shortest distance between two points

## new 440 solid-state microwave by Jerrold

One point is your head end, the other a remote program source. Your requirement . . . melt the distance and deliver a first-class video signal. Solution? Specify Jerrold 440 Microwave.

This compact and ultra-stable equipment provides sharp, strong pictures over longer distances. Need only a short hop? The extra power and stability lets you use smaller antennas for overall reduction of system cost.

"Solid state—high-output klystron" design provides maximum reliability plus greater fade margins. In a word, the 440 Series by Jerrold is the finest microwave gear available from any manufacturer, at any price. Check the specs—then check the cost.

If you're considering a system in either the 6gc common-carrier band or the new CARS (Community Antenna Relay Service) 12gc band, speak with Jerrold first.

Write today for complete data.

# The Great New Phoenician Series

## NEW Solid-State, All-Band, Trunkline Amplifiers

Featuring unsurpassed serviceability and flexibility ■ Unique design for easy "fool-proof" conversion ■ Die-cast aluminum casing, all-weather and moisture-proof ■ Universal-type fittings to accommodate all popular sizes and types of cable.

### THE OUTSIDE STORY

The new "Phoenician" series combines rugged construction, unusual serviceability, and dependable performance under all operating conditions. The 3 sealed access ports permit internal probe measurement in any weather without exposing the entire internal parts. Fittings of new design and moisture-proof seal are backed by Kaiser-Cox warranty. (Patent applied for) The new Kaiser-developed aluminum alloy used in fittings is impervious to corrosion.

*The Kaiser-Cox Phoenician series is ready NOW. The SOLID products you can **DEPEND** on . . . !*

**THE INSIDE STORY** of the Phoenician Amplifier series. Modular construction of the "plug-in" type allows complete interchangeability from trunkline amplifier to 2 and 4-output bridging amplifier — or combinations of trunkline and bridging amplifier (with or without AGC and automatic tilt). Built-in knob type controls eliminate the need for screwdrivers, plug-in pads or accessories.

**SOLID PERFORMANCE!** The new Kaiser-Cox "Phoenician" series works as well as it looks . . . CATV's finest all-band, "human-engineered" amplifier. The Phoenician series is your assurance that your CATV system (from head-end to tap-off) will deliver maximum signal quality with minimum degradation at all times. Low noise figure—minimum cross-modulation products — **CASCADEABILITY PLUS** — these are the results of Kaiser-Cox background in the exacting aerospace world of close tolerances, rigid specifications, quality control. An excess of 25,000 man-hours of engineering research and development, unrelenting purchasing standards and production know-how mean these Kaiser-Cox CATV products perform to published specifications.

## To get a good job, get a good education

Jobs demand it. Employers insist on it. So you'd better plan on having what it *really* takes to get the kind of job you want.

Today, there's no fooling about schooling. You honestly need a good education to get a good job . . . a good *paying* job . . . a job with a good future.

So, if you're in school now . . . stay there! Learn all you can for as long as you can. If you're out of school, there are plenty of ways to get valuable training outside the classroom. For details, visit the Youth Counsellor at your State Employment Service. Get a good education . . . you can't get ahead without one.
